Jackie,

Great. I think what the folks on I talked to about the fields what to avoid is duplicate contacts, i.e., giving you fields that you may already be working with.

Looks like a wonderful Fall weekend — the yard beckons but I have so much other work....ugh!

Mary, thank you! For the field sampling, the team is trying to reach out to all areas of the US (using a 4 quadrant system). Let me check with the team to see what the current status is and get back to you.

Have a great weekend.

Jackie

Subject: cryogenic rubber samples

Jackie,

I spoke to: Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] and he is willing to have sample takers visit his facility to gather fresh sample of cryogenically produced crumb rubber.

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] He has your name and will wait for your call.

I also gave your contact information to: Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] They use cryogenic processing to produce crumb rubber: Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] plans to call you.

You asked about synthetic turf fields that might be candidates for onsite field testing /sample collection. I contacted some folks and they would like to know if there are particular areas of the country that you would like to sample (or areas that you have not yet sampled). It would help narrow down potential fields for the sampling.

Best,

Mary
